SUMMARY

DevOps Engineer with 4+ years of experience in cloud infrastructure, automation, Kubernetes orchestration, and observability solutions within Ericsson telecom environments. Skilled in Python, Shell scripting, CI/CD automation, Prometheus, Grafana, OpenStack, and Kubernetes-based platform operations. Proven track record of building automation solutions that significantly reduce manual effort and improve operational efficiency, reliability, and monitoring visibility.

EXPERIENCE

Wipro Limited, Hyderabad, India, Devops Engineer

2021 – Present

Ericsson

- Eliminated **95%** of manual reporting overhead by engineering automated quarantine monitoring solution, reducing daily effort from **2 hours to 5 minutes**.
- Built scalable observability solutions using **Prometheus and Grafana**, improving system visibility and **reducing MTTR by 85%**.
- Delivered intelligent **Medicine & Falcon Script solution** reducing manual intervention by **90%**, featuring automated quarantine recovery with smart JIRA escalation for complex failure scenarios using Python and Shell scripting.
- Compressing effort from **2 months to 40 minutes (98% faster)** and enabling on-demand reporting for audits and capacity planning.
- Led enterprise-wide migration of **300+** RedHat servers to Rocky Linux using **Ansible**-based rolling deployment strategies.
- Designed and implemented enterprise automation solutions for deployment orchestration and configuration version management, contributing to approximately **\$5.9K annual** operational cost savings through workflow optimization
- Deployed and managed **2k+** Kubernetes-based VNF backends using **RossO framework**, orchestrating **multi-node ECCD clusters** with automated scaling policies and dynamic resource allocation, achieving **99.9%** uptime for mission critical telecommunications workloads.
- Maintained **CI/CD pipelines** using **Jenkins** for automated deployment of microservices and generic services, enabling faster feedback loops and improved development velocity.
- Automated checks and scripts** (e.g., environment/CCD version, hardware inventory, SFTP timing) to shorten triage cycles across PCC/PCG OpenStack clusters.
- Deployed production-scale vEPG instances using **BCAT (Box & Cloud Automation Tool)** across CEE/OpenStack environment.

SKILLS

Cloud & Infrastructure

OpenStack, GCP, Azure, Linux Administration

Automation & CI/CD

Python, Shell Scripting, Jenkins, Ansible, Terraform

Monitoring & Observability

Prometheus, Grafana

Containerization & Orchestration

Kubernetes, Docker, Helm

CERTIFICATIONS

- Professional Cloud Architect 
- Associate Cloud Engineer 
- Cloud Architect Using Microsoft Azure 
- AZ-900: Azure Fundamentals 

AWARDS

Victory League Award, Impact Player, Wipro

PROJECTS

Azure Cloud Architect Nanodegree | Udacity | 2022

12/2021 – 08/2022

- Designed highly available Azure infrastructure using Load Balancers, Availability Zones, and Traffic Manager.
- Implemented cost optimization and monitoring solutions using Azure Monitor and Log Analytics.
- Built secure cloud environments using Azure AD, RBAC, Sentinel, Key Vault, and Firewall.

Google Cloud Ready Facilitator , Google Cloud Community, India

05/2020 – 07/2020

- Built scalable cloud workloads using GKE, Terraform, Compute Engine, and Load Balancers.
- Implemented IAM, private networking, and CI/CD automation workflows on GCP.

EDUCATION

B. Tech in Electronics and Communication Engineering

07/2017 – 05/2021

Guru Nanak Institute of Technology, Hyderabad, India

Cumulative GPA: 7.0/10
